DHIRAJLAL GANDHI COLLEGE OF TECHNOLOGY

Importance of Sports and Cultural Events

We develop and educate our young men in a nurturing environment. Each student is inspired to grow and excel supported by staff, parents, College Management, caregivers, and our wider community. We believe that our faith should shine through in everything we do. We pride ourselves on providing a complete education to our young men, to getting to know them individually and to help them develop the talents.

We expect high standards from our students in everything they do. As a College our focus is on good teaching and learning in the classroom so our students have the opportunity to gain excellent academic results.

Sports and cultural opportunities provide opportunities for healthy competition, for physical and intellectual exercise, and help to grow well-rounded people. In some cases, these opportunities can lead to employment opportunities. Sport helps us to develop a sense of team and fair play, and a sense of school spirit.

Cultural activities also help with the development of teamwork skills and our school spirit, as well as extend the mind and broader understanding of the world, and create a love of the Arts. We want to provide opportunities for our students to participate and to excel in sports and cultural activities.

We want to use these activities to build our students morale and our sense of belonging. These activities can also help develop resilience, character and leadership as young people learn to accept defeat graciously and victory humbly.

Through sporting and cultural exchanges with other colleges, our young men broaden their horizons and networks, developing connections beyond their Dhirajlal Gandhi College community that may endure through their lifetimes. We will

DHIRAJLAL GANDHI COLLEGE OF TECHNOLOGY

always expect a culture of fair play, of honesty and respect for officials and for opponents.

We provide a range of sporting opportunities. For top teams in established codes, we provide a range of traditional games and exchanges that are part of the fabric of the College.

We provide a range of cultural opportunities. Our cultural groups are given opportunity to participate in traditional exchanges and cultural celebrations, and opportunity to compete and perform in local and national cultural competitions.

We provide a range of opportunities in the performing arts. Our musicians, dancers and singers are given opportunity to entertain and demonstrate their skills in a variety of settings.

As far as practicable, sporting and cultural groups are encouraged to structure the commitments expected of participants so as not to prevent students from participating in other activities, or conflict with academic commitments.

The College Principal is tasked with managing the School Calendar and fixtures the College promotes participation in so as to maximize the opportunities for our students to participate in the fabric of the College in as many ways as they can.

This objective is subject to the first two of our guiding principles: extracurricular activities ought not to intrude on College life to the extent that the academic progress of any student is compromised at all times. As part of this function, the College Principal manages a calendar of known extracurricular events and key academic dates to help identify and manage pressure points in the calendar. That calendar locks in some key events that are part of the College tradition, around which other activities need to be accommodated.

Sporting and cultural groups are encouraged to put forward their respective major events at the start of each year so that all can be treated fairly in light of the constraints.
